

REMARKS/ARGUMENTS

This paper is submitted responsive to the Office Action mailed November 12, 2008. Reconsideration of the application in light of the accompanying remarks and amendments is respectfully requested.

In the aforesaid action, the Examiner objects to the application for failing to include a drawing showing the reflective layer. A proposed new sheet of drawings is attached hereto and it is believed that this sheet of drawings will address this concern. Upon approval by the Examiner, the specification will be further amended to add reference to this drawing and the reference numerals shown thereon.

The Examiner also objected to the specification as failing to include section headings. The present amendment inserts these headings into the application, which is believed to now be in proper format.

The Examiner had rejected the claims as improper dependent form, method claim format, and as indefinite. By the present paper, the claims have been carefully amended to address these issues, and it is submitted that the claims as presented herein are in proper form.

It is noted that no prior art was applied to the claims in the last Office Action. It is believed that the claims as pending herein have addressed all formal issues raised, and that these claims are in condition for allowance.

An earnest and thorough effort has been made to address each and every issue raised in the action and place this application in condition for allowance. If, upon considering this paper, the Examiner is of the opinion that issues remain which could be addressed by telephone interview, the Examiner is invited to telephone the undersigned for such an interview.

This paper is accompanied by authorization to charge a deposit account for the fees for extra claims. It is believed that no other fee is due. If any additional fees are required in connection with this case, it is respectfully requested that
